TOMAHAWK SP TETHERBALL SET

Tetherball post shall be constructed of 2 3/8" OD x 3/16" wall steel tubing. Post shall have a galvanized finish to prevent rust. Painted posts shall not be considered equal. Base of post shall have a machined notch at the bottom to prevent the post from rotating during play. Post shall be a one-piece post x 12' long to allow 24" of post to extend below the playing surface. Rope shall have a recessed connection to ball for player comfort and safety. Rope shall connect to top of post via an eyebolt and carabiner clip. A PVC ground sleeve shall be included. Ground sleeve shall have anti-rotation bolt installed which engages notch at bottom of post to prevent post rotation during play. A cap shall be included to cover sleeve when post is removed.

System shall include post, tetherball with rope, hardware, PVC ground sleeve with cap.

Tomahawk SP Tetherball set shall carry a Lifetime Limited Warranty.

System weight shall be 60 lbs.
