

**FT36-HFM Backboard Support Structure**

1. **SUPPORT STRUCTURE** - FT36-HFM shall be 3/16" thick steel tubular construction. Structure shall be powder coated silver. Structure shall be designed to bolt into the backside of most 36" tall backboards manufactured by First Team, Inc. Mounting structure shall provide mounting slots allowing backboard to be mounted to any standard 20"x35" mounting pattern on wall, ceiling or pole mounted support structures. Structure shall also provide adequate rim support to guard against backboard breakage when players hang from rim. Structure gives backboard a minimum 10-Year Limited Warranty. Approximate weight: 49 lbs.
